Tarrant county client is looking for a GIS Developer. This is a contract position.

Qualified candidate will be responsible for the development of GIS applications, web based map services, and sys/app support administration of the engineering GIS applications and environment. Development efforts include the ability to create and maintain mapping services that are intuitive, visually appealing, and properly tuned to perform well in the server environment and on the web. Design experience with mapping caches is a plus.

Duties include: Install, configure, and maintain ArcGIS Server application instances for the TS Engineering team. Create geoprocessing scripts to manipulate data within ArcSDE feature classes.

The successful candidate should possess a strong understanding of coordinate systems and various map projections, and should be able to create and maintain various geo-processing tasks via scripting or programming languages.

The successful candidate should possess the ability to work with and convert between a variety of data sources, including but not limited to, ArcSDE Feature Classes, shapefiles, .kml/.kmz files, and .csv files.

### **Required Technical skills include:**

Esri ArcGIS Java Script API

Esri ArcSDE

Esri ArcGIS Server

Java, JSP, JavaScript, HTML

Ability to work with shapefiles and file geodatabases

SQL

Familiarity with Linux / Windows operating systems

**Desired Technical skills include:**

Python or similar scripting language (supported by ArcGIS)

Ajax, Dojo, JQuery

WMS / WFS

DB2 Spatial Extender

Strong cartography skills
